**PERAX** AUTOMATES DE TÉLÉGESTION

## Customized Solutions

PERAX develops complete systems designed for remote surveillance, automation, and for data centralization and analysis. Specialized in the management of natural and energy resources, these systems adapt to the specificity of all your installations.

## An effective tool to optimize exploitation and costs

PERAX's products allow to control one or several autonomous installations, without having to move your staff. Maintenance operations forecasting guarantees to cover optimum continuity and quality of services.

## Looking the best

PERAX has been certified ISO 9001 since 2001 (2008 version). It is committed to continuously improve its products to best satisfy your needs. Through constant technology watch, PERAX develops competitive and evolving products respecting current norms and standards.

## Time-proven Experience

The fieldwork experience PERAX has acquired since 1978 has allowed us to provide you with solid and expert knowledge in tailoring your needs in long-system management systems, provide quality training and guarantee reliable technical assistance.

### Tanks
